FlowStone Opportunity Fund -Secondary Case Studies

The following slides outline select transactions that have been completed by the FlowStone Opportunity Fund

FlowStone Opportunity Fund is a registered investment vehicle designed to provide investors with highly diversified exposure to the Private Equity asset class through secondary, primary, and co-investment strategies. The Fund offers diversification by manager, stage, strategy, and vintage year through a single allocation. The Fund's primary investment objective is to generate appropriate risk-adjusted long-term returns by investing in a diversified portfolio of private equity investments

CONFIDENTIAL

Important Disclosures

BEFORE INVESTING YOU SHOULD CAREFULLY CONSIDER THE FUND'S INVESTMENT OBJECTIVES, RISKS, CHARGES AND EXPENSES. THIS AND OTHER INFORMATION IS IN THE PROSPECTUS, A COPY OF WHICH MAY BE OBTAINED FROM FLOWSTONE PARTNERS AT 312-429-2488. PLEASE READ THE PROSPECTUS CAREFULLY BEFORE YOU INVEST.

The Shares are speculative and illiquid securities involving substantial risk of loss. An investment in the Fund is appropriate only for those investors who do not require a liquid investment, for whom an investment in the Fund does not constitute a complete investment program, and who fully understand and can assume the risks of an investment in the Fund. Investors should carefully review and consider potential risks before investing. The Fund has been organized as a non-diversified, closed-end management investment company and designed primarily for long-term investors. An investor should not invest in the Fund if the investor needs a liquid investment. The Fund could experience fluctuations in its performance due to several factors. As a result of these factors, results for any previous period should not be relied upon as being indicative of performance in future periods.

The Fund Investments may include low grade or unrated debt securities ("high yield" or "junk" bonds or leveraged loans) or investments in securities of distressed companies. Such investments involve substantial, highly significant risks. The Fund may invest in mezzanine debt instruments, which are expected to be unsecured and made in companies with capital structures having significant indebtedness ranking ahead of the investments, all or a significant portion of which may be secured. The Portfolio Fund Managers and (subject to applicable law) the Fund may employ leverage through borrowings or derivative instruments and are likely to directly or indirectly acquire interests in companies with highly leveraged capital structures. The Fund and Portfolio Fund Managers may use derivatives and the use of derivative instruments for hedging or speculative purposes by the Fund or the Portfolio Fund Managers could present significant risks, including the risk of losses in excess of the amounts invested. The overall performance of the Fund's secondary investments will depend in large part on the acquisition price paid, which may be negotiated based on incomplete or imperfect information. Secondary investments may also incur contingent liability risk and syndicate risk. Potential lack of diversification and resulting higher risk due to concentration of allocation authority when a single adviser is utilized. The Adviser does not control the investments or operations of the Portfolio Funds. For a complete discussion of risks please review the prospectus carefully.

Case Study – Project Envy

Project Envy is a secondary purchase of a diversified portfolio of credit positions in sponsor-backed middle market companies (average company EBITDA ~\$130mm). The GP was established in 2008 and operates as the credit platform for a high quality, continuous private equity platform with >\$15B AUM

Transaction Overview	 Strip sale of assets from the PE manager's balance sheet; \$450mm total transaction size Traditional secondary purchase via commitment to an acquisition vehicle; ~70% of transaction capital used for portfolio acquisition, ~30% used for follow-on and future new investments Diversified credit portfolio with balanced exposure to various industry sectors 67 positions with a maximum individual position size of only 3.0% (of total NAV) 	Tra To Pu Pu # c
Seller Objective	 Transaction provided the GP with third-party capital, allowing for continued platform expansion Sought a strategic, experienced partner with a long-term perspective and potential for future transactions 	So Re Cle
Investment Highlights	 Since inception in 2008, the GP has generated strong risk-adjusted returns, investing ~\$5.0B with no defaults and a cumulative loss ratio of 0.33% The portfolio has a 9.0% cash yield which reduces investment risk and provides strong visibility on near-term cash flows The GP and PE manager invested \$125mm in the transaction, helping ensure aligned incentives The GP benefits from the systematic sharing of insight, knowledge, idea generation & deal sourcing thanks to its strategic relationship with the PE platform

Portfolio Overview

Case Study – Project Grid

Project Grid is a traditional secondary purchase where FlowStone acquired 15 fund interests, representing a diversified portfolio of 50+ companies with the majority of value in less cyclical industries including healthcare and IT. By leveraging deep relationships with the intermediary, the seller, and the underlying General Partners, FlowStone was able to provide an "end of life" solution while seeking to generate an attractive return for FlowStone investors.

Transaction Overview	positions	Tra To Pu
Seller Objective	 The seller was a OS-based private markets manager looking to proactively wind-down two older Fund-of-Funds ("FoFs) programs by selling the underlying portfolios The remaining net asset value ("NAV") in the FoFs was small when compared to the already realized value. As a result, the Seller's price sensitivity was low 	Pu # o # o So Re Clo
Investment Highlights	 Several mature assets in less-cyclical industries with meaningful revenues & EBITDA and attractive operational growth metrics The transaction closed nine months after the reference date, allowing FlowStone to capture additional valuation appreciation across the underlying portfolio Due to the matureness of the underlying funds, the portfolio is highly cash generative with over 10% of reference NAV already distributed before closing

Case Study – Project Fin

Project Fin is the secondary acquisition of a defaulting limited partner's commitment to Fin Venture Capital's ("FVC") Fund I, a 2018 vintage vehicle focused on investments in the FinTech space. This investment opportunity offered FlowStone the ability to invest in high growth assets below the fund's original investment cost basis, while still benefitting from the value appreciation that had already occurred during FVC's ownership. While the fund is focused on early-stage investments, most of the fund's asset value (72%) is linked to two well-capitalized category leaders with compelling business models and fast-growing end-markets

Case Study – Project AMP CF

Project AMP CF entails a commitment to a newly formed continuation vehicle to be managed by a single GP, with whom FlowStone is an existing LP. This new fund structure was setup to acquire a portfolio of medical device companies held across the manager's portfolio. The crossover holdings were rolled into a newly formed vehicle, with two distinct share classes, setup for a select group of existing LP's and new investors, respectively. Given our relationship with the GP and status as an existing LP (due to a prior portfolio deal), Flowstone was presented with the opportunity to roll our exposure and commit capital to a portfolio comprised of attractive medical device and medical technology assets. These three well-performing, high conviction assets will be managed by top tier executive teams and an established, Fund Manager.

CONFIDENTIAL

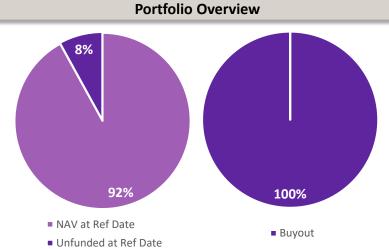

Case Study – Project Boston College

Project Boston College is a traditional secondary investment in which FlowStone acquired an institutional sellers' interest in BC European Capital IX, L.P., an established, high-quality manager. The remaining assets in the portfolio include thirteen companies in diversified industries, including healthcare, technology, and pet services. FlowStone gained exposure to mature buyout assets which had generally demonstrated resiliency to the broader COVID impact on economic growth

Transaction Overview	 Secondary purchase of an interest in BC European Partners IX, a 2011 vintage buyout fund with 13 assets spread across a variety of sectors and geographies; predominantly North America and Western Europe
Seller Objective	• The seller was a large US-based institution seeking to rebalance their portfolio while reducing the number of private equity relationships they manage
Investment Attractions	 Access to a high-quality GP that has delivered strong returns for investors across multiple economic cycles Strong visibility into additional valuation appreciation from the reference date 6/30 through close No blind pool risk given the fund vintage year and corresponding limited unfunded amount
	 Exposure to companies that proved fairly COVID resistant on a blended basis and, in some instances, benefitted from macro tail-winds and changing consumer behavior patterns that may persist
	 The entry discount combined with the portfolio uplift seeks to provide near-term downside management in the event of unexpected, adverse portfolio moves

Case Study – Project Colonial

Project Colonial is a secondary purchase of a portfolio where FlowStone acquired 6 fund interests, representing a diversified portfolio of 30+ companies with the bulk of the exposure tied to less cyclical industries and COVID-19 resilient industries including Pharma / Biotech, Healthcare Devices, Healthcare Technology, and Consumer Durables. Through leveraging a deep and long-standing relationship with the intermediary, FlowStone was able to provide a single-solution portfolio bid to the seller, which in turn afforded FSOF the ability to gain exposure to mature buyout / VC interests with a mix of near-term liquidity and room for future value creation across the portfolio.

Transaction	•	Secondary purchase of a diversified portfolio of 6	Transaction Snapshot

Case Study – Project Machine

Project Machine is a spin-out of the US team of Kennet Partners ("Kennet"), a lower middle market firm based in the UK. The US team was seeking to fully capitalize on their domestic market and thus amicably agreed with Kennet to spin-out the US team and the corresponding US-based portfolio companies. The new firm is named Savant Growth ("Savant"). Savant entered into exclusivity with a syndicate of secondary investors to capitalize Savant Growth Fund I ("Fund I"). The capital was used to: (i) acquire the equity interests of the 6 US-based portfolio companies from Kennet managed vehicles; and (ii) provide unfunded capital for follow-on investments and management fees

Case Study – Project Destiny

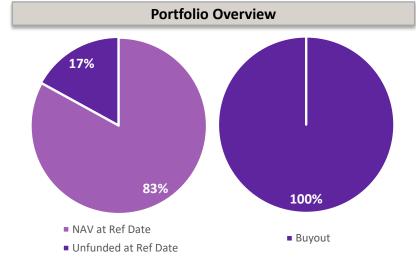

Project Destiny represents the creation of a single-asset continuation fund for a leading provider of digital security and technology infrastructure solutions (the "Company"). The Company is backed by two well-known, high performing sponsors who believe there is material upside in the Company and are pursuing Project Destiny in order to capitalize on the various value creation opportunities made available by increasing the duration of the investment and providing additional growth capital. FSOF participated in Project Destiny in a syndicate capacity alongside other prominent investors

Transaction Overview	 Project Destiny establishes a single-asset continuation fund for a leading provider of high- assurance digital certificates, certificate management, and public-key infrastructure solutions, which enable authentication and encryption for web servers and Internet of Things devices
Seller Objective	 Project Destiny was formed to allow the sponsors and investor syndicate to maximize value in the Company by i) "resetting the duration", giving the Company additional time to capitalize on growth initiatives and ii) provide a modest amount of follow-on capital for potential M&A and other growth initiatives
Investment Attractions	 Exposure to a market leading software provider, which exhibits significant scale and attractive operational metrics. The business also features high barriers to entry due to complex regulatory and new entrant approval processes Strong alignment of interests between the GPs and LPs. The lead sponsor contributed all its crystalized carried interest from the sale of the Company to the Continuation Fund and is also investing an additional \$50mm. Additionally, the second sponsor is rolling over ~\$600mm in the transaction Experienced and high-quality management team

Case Study – Project Waterfall

Project Waterfall is a transaction in which FlowStone partnered with a secondary buyer and other investors to acquire a €386mm diversified LP portfolio. The portfolio consists of 98 underlying funds (~90% buyout funds) and provides diversified exposure across key metrics including industry sector, geography and vintage year

Transaction Overview	 Project Waterfall provides exposure to 98 underlying funds, the vast majority of which are buyout focused with assets based in North America and Europe. The portfolio is highly diversified and has a weighted average vintage of 2008
Seller Objective	• The seller in this transaction was seeking to wind down an older investment vehicle, as well as raise additional capital for their newest investment vehicle. The secondary transaction solved for these objectives and includes a small commitment to their new fund
Investment Attractions	 Highly cash generative portfolio as referenced by the post reference date distributions, which help to de-risk the transaction relatively quickly Limited remaining unfunded capital, mitigating blind pool risk Exposure to a highly diversified asset pool, consisting of 98 funds, 62 GPs, and 11 underlying sectors. The largest individual company exposure accounted for only 3.7% of transaction level NAV Strong operational performance observed across the portfolio The transaction closed nine months after the reference date, providing operational visibility and allowing FlowStone to realize additional valuation appreciation across the underlying portfolio

Glossary

EBITDA – Earnings Before Interest, Taxes, Depreciation, and Amortization

Intermediary – Transactions where a broker is involved and acts as an intermediary between the buy and sell side

Proprietary – Transactions originated via the FlowStone Opportunity Fund platform where a broker is not involved

Syndicate – A group of buyers who combine to purchase a specific interest

Synthetic – Secondary investors acquire an interest in a new limited partnership that is formed specifically to hold a portfolio of investments. Typically, the manager of the new fund had historically managed the assets as a captive portfolio

Primary or Primary Investment – Primary investments (primaries) are interests or investments in newly established private equity funds. Primary investors subscribe for interests during an initial fundraising period, and their capital commitments are then used to fund investments in several individual operating companies (typically ten to thirty) during a defined investment period. The investments of the fund are usually unknown at the time of commitment, and investors typically have little or no ability to influence the investments that are made during the fund's life

Seasoned Primary – Similar to a Primary Investment; however, when the investor commits to the fund during the initial fundraising period, the newly established fund has already completed a number of transactions. Importantly, there is still a relatively high amount of unfunded capital that will be drawn down to make new platform investments

Secondary or Secondary Investment – Secondary Investments are interests in existing private equity funds that are acquired in privately negotiated transactions, typically after the end of the private equity fund's fundraising period. The investments of the acquired fund are usually known at the time of acquisition, and the majority of the fund's capital is typically drawn down and invested by the time of the fund's acquisition
